
AS & A Level Mathematics (9709) Paper 5

[Probability & Statistics 1]

Exam Series: May 2015 – May 2022

Format Type A:

Answers to all questions are provided as an appendix

Chapter 1

Representation of data

1. 9709_m22_qp_52 Q: 3

At a summer camp an arithmetic test is taken by 250 children. The times taken, to the nearest minute, to complete the test were recorded. The results are summarised in the table.

Time taken, in minutes	0 - 30	30.5 - 45.5	46 - 65	65.5 - 75.5	75.5 - 100.5
Frequency	21	30	68	86	45
	21	51	119	205	250

- (a) Draw a histogram to represent this information.

[4]

- (b) State which class interval contains the median.

[1]

..... the class interval is 66 - 75

.....

.....

- (c) Given that an estimate of the mean time is 61.05 minutes, state what feature of the distribution accounts for the median and the mean being different.

[1]

.....

.....

.....

2. 9709_s22_qp_51 Q: 3

The times taken to travel to college by 2500 students are summarised in the table.

Time taken (t minutes)	$0 \leq t < 20$	$20 \leq t < 30$	$30 \leq t < 40$	$40 \leq t < 60$	$60 \leq t < 90$	≥ 90
Frequency	440	720	920	300	120	2500

4400 18,000 32,400 15,000 9,000 78,600
 [4]

- (a) Draw a histogram to represent this information.

From the data, the estimate of the mean value of t is 31.44.

- (b) Calculate an estimate of the standard deviation of the times taken to travel to college. [3]

$$\frac{\sum x^2 f}{\sum f} - \left(\frac{\sum xf}{\sum f} \right)^2$$

$$\Rightarrow \frac{3046000}{2500} - (31.44)^2$$

$$= \sqrt{229.9264}$$

$$= 15.16$$

- (c) In which class interval does the upper quartile lie? [1]

It was later discovered that the times taken to travel to college by two students were incorrectly recorded. One student's time was recorded as 15 instead of 5 and the other's time was recorded as 65 instead of 75.

- (d) Without doing any further calculations, state with a reason whether the estimate of the standard deviation in part (b) would be increased, decreased or stay the same. [1]

3. 9709_s22_qp_52 Q: 1

For n values of the variable x , it is given that

$$\Sigma(x - 200) = 446 \quad \text{and} \quad \Sigma x = 6846.$$

Find the value of n .

[3]

4. 9709_s22_qp_52 Q: 3

The back-to-back stem-and-leaf diagram shows the diameters, in cm, of 19 cylindrical pipes produced by each of two companies, A and B.

Key: 1|35|3 means the pipe diameter from company A is 0.351 cm and from company B is 0.353 cm. $\therefore 14.25$

- (a) Find the median and interquartile range of the pipes produced by company A. [3]

$$\begin{aligned} &\Rightarrow 0.359 \text{ cm} = \text{median} \\ &\Rightarrow 0.358 \text{ cm} = q_1 \\ &\Rightarrow 0 \end{aligned}$$

It is given that for the pipes produced by company B the lower quartile, median and upper quartile are 0.346 cm, 0.352 cm and 0.370 cm respectively.

- (b) Draw box-and-whisker plots for companies A and B on the grid below. [3]

$$\begin{aligned} \text{Small} &\Rightarrow 0.331 \\ \text{large} &\Rightarrow 0.382 \\ q_1 &\Rightarrow 0.346 \\ m &\Rightarrow 0.352 \\ q_2 &\Rightarrow 0.370 \end{aligned}$$

- (c) Make one comparison between the diameters of the pipes produced by companies A and B. [1]

.....

.....

5. 9709_s22_qp_53 Q: 1

The time taken, t minutes, to complete a puzzle was recorded for each of 150 students. These times are summarised in the table.

Time taken (t minutes)	$t \leq 25$	$t \leq 50$	$t \leq 75$	$t \leq 100$	$t \leq 150$	$t \leq 200$
Cumulative frequency	16	44	86	104	132	150

- (a) Draw a cumulative frequency graph to illustrate the data. [2]

- (b) Use your graph to estimate the 20th percentile of the data. [1]

$$\frac{20}{100} \times 150 = 30\text{th value}$$

$$\frac{P - 25}{50 - 25} = \frac{30 - 16}{44 - 16} \quad 20\text{th p} = \frac{37.5}{2}$$

$$\frac{P - 25}{25} \times \frac{25}{2} = \frac{1}{2} \times 25$$

$$P - 25 = 12.5$$

$$P = 37.5$$

6. 9709 - s22 - qp - 53 Q: 2

Twenty children were asked to estimate the height of a particular tree. Their estimates, in metres, were as follows.

~~4.1~~ ~~4.2~~ ~~4.4~~ ~~4.5~~ ~~4.6~~ ~~4.8~~ ~~5.0~~ ~~5.2~~ ~~5.3~~ 5.4
5.5 ~~5.8~~ ~~6.0~~ ~~6.2~~ ~~6.3~~ ~~6.4~~ ~~6.6~~ ~~6.8~~ ~~6.9~~ ~~7.4~~

- (a) Find the mean of the estimated heights. [1]

$$\frac{5.4 + 5.5}{2} = 5.45 \text{ m}$$

- (b) Find the median of the estimated heights. [1]

(c) Give a reason why the median is likely to be more suitable than the mean as a measure of the central tendency for this information. [1]

7. 9709_m21_qp_52 Q: 5

A driver records the distance travelled in each of 150 journeys. These distances, correct to the nearest km, are summarised in the following table.

Distance (km)	0 – 4	5 – 10	11 – 20	21 – 30	31 – 40	41 – 60
Frequency	12	16	32	66	20	4

- (a) Draw a cumulative frequency graph to illustrate the data.

[4]

- (b)** For 30% of these journeys the distance travelled is d km or more.

Use your graph to estimate the value of d .

[2]

- (c) Calculate an estimate of the mean distance travelled for the 150 journeys. [3]

8. 9709_s21_qp_51 Q: 5

The times taken by 200 players to solve a computer puzzle are summarised in the following table.

Time (t seconds)	$0 \leq t < 10$	$10 \leq t < 20$	$20 \leq t < 40$	$40 \leq t < 60$	$60 \leq t < 100$
Number of players	16	54	78	32	20

- (a) Draw a histogram to represent this information.

[4]

- (b) Calculate an estimate of the mean time taken by these 200 players. [2]

- (c) Find the greatest possible value of the interquartile range of these times. [2]

9. 9709_s21_qp_52 Q: 7

The heights, in cm, of the 11 basketball players in each of two clubs, the Amazons and the Giants, are shown below.

Amazons	205	198	181	182	190	215	201	178	202	196	184
Giants	175	182	184	187	189	192	193	195	195	195	204

- (a) State an advantage of using a stem-and-leaf diagram compared to a box-and-whisker plot to illustrate this information. [1]

.....
.....
.....
.....
.....

- (b) Represent the data by drawing a back-to-back stem-and-leaf diagram with Amazons on the left-hand side of the diagram. [4]

- (c) Find the interquartile range of the heights of the players in the Amazons. [2]

Four new players join the Amazons. The mean height of the 15 players in the Amazons is now 191.2 cm. The heights of three of the new players are 180 cm, 185 cm and 190 cm.

- (d) Find the height of the fourth new player. [3]

A large, semi-transparent watermark is positioned diagonally across the page. The text "PapaCam" is written in a bold, sans-serif font. The letters are primarily a light grey color, but the "P" and "C" are filled with a solid red color. The watermark is oriented from the bottom-left towards the top-right, covering approximately one-third of the page area.

10. 9709_s21_qp_53 Q: 1

The heights in cm of 160 sunflower plants were measured. The results are summarised on the following cumulative frequency curve.

- (a) Use the graph to estimate the number of plants with heights less than 100 cm. [1]
-
.....
.....

- (b) Use the graph to estimate the 65th percentile of the distribution. [2]

- (c) Use the graph to estimate the interquartile range of the heights of these plants. [2]

11. 9709_s21_qp_53 Q: 3

A sports club has a volleyball team and a hockey team. The heights of the 6 members of the volleyball team are summarised by $\Sigma x = 1050$ and $\Sigma x^2 = 193\ 700$, where x is the height of a member in cm. The heights of the 11 members of the hockey team are summarised by $\Sigma y = 1991$ and $\Sigma y^2 = 366\ 400$, where y is the height of a member in cm.

- (a) Find the mean height of all 17 members of the club. [2]

- (b) Find the standard deviation of the heights of all 17 members of the club. [3]

12. 9709_w21_qp_51_Q: 2

A summary of 40 values of x gives the following information:

$$\Sigma(x - k) = 520, \quad \Sigma(x - k)^2 = 9640,$$

where k is a constant.

- (a) Given that the mean of these 40 values of x is 34, find the value of k . [2]

- (b) Find the variance of these 40 values of x . [2]

A decorative graphic element located in the top left corner of the page. It consists of a large, semi-transparent diamond shape composed of overlapping blue and red triangles. Below this larger diamond is a smaller cluster of smaller diamonds in various colors (red, green, blue) and patterns (solid, checkered). The entire graphic is set against a background of horizontal dotted lines.

13. 9709_w21_qp_51 Q: 6

The weights, in kg, of 15 rugby players in the Rebels club and 15 soccer players in the Sharks club are shown below.

Rebels	75	78	79	80	82	82	83	84	85	86	89	93	95	99	102
Sharks	66	68	71	72	74	75	75	76	78	83	83	84	85	86	92

- (a) Represent the data by drawing a back-to-back stem-and-leaf diagram with Rebels on the left-hand side of the diagram. [4]

(b) Find the median and the interquartile range for the Rebels.

[3]

A box-and-whisker plot for the Sharks is shown below.

- (c) On the same diagram, draw a box-and-whisker plot for the Rebels. [2]

(d) Make one comparison between the weights of the players in the Rebels club and the weights of the players in the Sharks club. [1]

14. 9709_w21_qp_52 Q: 7

The distances, x m, travelled to school by 140 children were recorded. The results are summarised in the table below.

Distance, x m	$x \leq 200$	$x \leq 300$	$x \leq 500$	$x \leq 900$	$x \leq 1200$	$x \leq 1600$
Cumulative frequency	16	46	88	122	134	140

- (a) On the grid, draw a cumulative frequency graph to represent these results. [2]

- (b) Use your graph to estimate the interquartile range of the distances. [2]

- (c) Calculate estimates of the mean and standard deviation of the distances. [6]

A large, semi-transparent watermark reading "PapaCambridge" diagonally across the page. The text is in a red and grey font. The "P" and "C" are red, while the other letters are grey. Below the text is a graphic element consisting of several overlapping triangles and small colored dots (red, green, blue) in the bottom-left corner.

15. 9709_w21_qp_53 Q: 2

Lakeview and Riverside are two schools. The pupils at both schools took part in a competition to see how far they could throw a ball. The distances thrown, to the nearest metre, by 11 pupils from each school are shown in the following table.

Lakeview	10	14	19	22	26	27	28	30	32	33	41
Riverside	23	36	21	18	37	25	18	20	24	30	25

- (a) Draw a back-to-back stem-and-leaf diagram to represent this information, with Lakeview on the left-hand side. [4]

- (b) Find the interquartile range of the distances thrown by the 11 pupils at Lakeview school. [2]

.....

.....

.....

.....

.....

.....

.....

.....

16. 9709_w21_qp_53 Q: 3

The times taken, in minutes, by 360 employees at a large company to travel from home to work are summarised in the following table.

Time, t minutes	$0 \leq t < 5$	$5 \leq t < 10$	$10 \leq t < 20$	$20 \leq t < 30$	$30 \leq t < 50$
Frequency	23	102	135	76	24

- (a) Draw a histogram to represent this information.

[4]

.....

.....

.....

.....

.....

.....

.....

.....

.....

- (b) Calculate an estimate of the mean time taken by an employee to travel to work. [2]

17. 9709_m20_qp_52 Q: 7

Helen measures the lengths of 150 fish of a certain species in a large pond. These lengths, correct to the nearest centimetre, are summarised in the following table.

Length (cm)	0 – 9	10 – 14	15 – 19	20 – 30
Frequency	15	48	66	21

- (a) Draw a cumulative frequency graph to illustrate the data.

[4]

- (b) 40% of these fish have a length of d cm or more. Use your graph to estimate the value of d . [2]

.....
.....
.....
.....

The mean length of these 150 fish is 15.295 cm.

- (c) Calculate an estimate for the variance of the lengths of the fish. [3]

A large, semi-transparent watermark reading "PapaCambridge" diagonally across the page. The text is in a red-to-blue gradient. Below the text is a stylized graphic of a pencil or marker tip, colored blue and red, with small decorative dots and shapes at its base.

18. 9709_s20_qp_51 Q: 7

The numbers of chocolate bars sold per day in a cinema over a period of 100 days are summarised in the following table.

Number of chocolate bars sold	1 – 10	11 – 15	16 – 30	31 – 50	51 – 60
Number of days	18	24	30	20	8

- (a) Draw a histogram to represent this information.

[5]

- (b) What is the greatest possible value of the interquartile range for the data? [2]

- (c) Calculate estimates of the mean and standard deviation of the number of chocolate bars sold. [4]

19. 9709_s20_qp_52 Q: 1

For n values of the variable x , it is given that

$$\Sigma(x - 50) = 144 \quad \text{and} \quad \Sigma x = 944.$$

Find the value of n .

[3]

20. 9709_s20_qp_52 Q: 3

Two machines, A and B , produce metal rods of a certain type. The lengths, in metres, of 19 rods produced by machine A and 19 rods produced by machine B are shown in the following back-to-back stem-and-leaf diagram.

A						B				
					21	1	2	4		
	7	6	3	0	22	2	4	5	5	6
8	7	4	3	1	23	0	2	6	8	9
	5	5	5	3	24	3	3	4	6	
	4	3	1	0	25	6				

Key: 7 | 22 | 4 means 0.227 m for machine A and 0.224 m for machine B.

- (a) Find the median and the interquartile range for machine A. [3]

It is given that for machine B the median is 0.232 m, the lower quartile is 0.224 m and the upper quartile is 0.243 m.

- (b) Draw box-and-whisker plots for A and B . [3]

- (c) Hence make two comparisons between the lengths of the rods produced by machine A and those produced by machine B. [2]

21. 9709_s20_qp_53 Q: 6

The annual salaries, in thousands of dollars, for 11 employees at each of two companies *A* and *B* are shown below.

Company A	30	32	35	41	41	42	47	49	52	53	64
Company B	26	47	30	52	41	38	35	42	49	31	42

- (a) Represent the data by drawing a back-to-back stem-and-leaf diagram with company *A* on the left-hand side of the diagram. [4]

- (b) Find the median and the interquartile range of the salaries of the employees in company A. [3]

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

A new employee joins company B. The mean salary of the 12 employees is now \$38 500.

- (c) Find the salary of the new employee. [3]

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

22. 9709_w20_qp_51 Q: 6

The times, t minutes, taken by 150 students to complete a particular challenge are summarised in the following cumulative frequency table.

Time taken (t minutes)	$t \leq 20$	$t \leq 30$	$t \leq 40$	$t \leq 60$	$t \leq 100$
Cumulative frequency	12	48	106	134	150

- (a) Draw a cumulative frequency graph to illustrate the data. [2]

- (b) 24% of the students take k minutes or longer to complete the challenge. Use your graph to estimate the value of k . [2]

- (c) Calculate estimates of the mean and the standard deviation of the time taken to complete the challenge. [6]

A large, semi-transparent watermark is positioned diagonally across the page. The watermark features the text "Papacanbridge" in a red, sans-serif font. To the left of the text is a stylized icon of a building or bridge structure composed of geometric shapes like triangles and rectangles in shades of blue, red, and green.

23. 9709_w20_qp_52 Q: 5

The following table gives the weekly snowfall, in centimetres, for 11 weeks in 2018 at two ski resorts, Dados and Linva.

Dados	6	8	12	15	10	36	42	28	10	22	16
Linva	2	11	15	16	0	32	36	40	10	12	9

- (a) Represent the information in a back-to-back stem-and-leaf diagram.

[4]

- (b) Find the median and the interquartile range for the weekly snowfall in Dados. [3]

- (c) The median, lower quartile and upper quartile of the weekly snowfall for Linva are 12, 9 and 32 cm respectively. Use this information and your answers to part (b) to compare the central tendency and the spread of the weekly snowfall in Dados and Linva. [2]

A red rocket ship with a blue base and a green and blue logo on its side, flying through a dotted space.

24. 9709_w20_qp_53 Q: 7

A particular piece of music was played by 91 pianists and for each pianist, the number of incorrect notes was recorded. The results are summarised in the table.

Number of incorrect notes	1 – 5	6 – 10	11 – 20	21 – 40	41 – 70
Frequency	10	5	26	32	18

- (a) Draw a histogram to represent this information.

[5]

- (b) State which class interval contains the lower quartile and which class interval contains the upper quartile.

Hence find the greatest possible value of the interquartile range.

[2]

- (c) Calculate an estimate for the mean number of incorrect notes. [3]

The logo for Papacat is positioned at the top of the page. It features a large, stylized graphic of a cat's head in profile, facing right. The cat has a dark blue body, a red ear, and a white face with black whiskers. Above the cat's head, the word "Papacat" is written in a bold, slanted font. The letters are primarily grey, with the "P" and "C" in red. The background of the logo is a light grey gradient.

25. 9709 - m19 - qp - 62 Q: 2

For 40 values of the variable x , it is given that $\Sigma(x - c)^2 = 3099.2$, where c is a constant. The standard deviation of these values of x is 3.2.

- (i) Find the value of $\Sigma(x - c)$. [3]

- (ii) Given that $c = 50$, find the mean of these values of x . [1]

.....
.....
.....

26. 9709_m19_qp_62 Q: 5

The weights, in kg, of the 11 members of the Dolphins swimming team and the 11 members of the Sharks swimming team are shown below.

Dolphins	62	75	69	82	63	80	65	65	73	82	72
Sharks	68	84	59	70	71	64	77	80	66	74	72

- (i) Draw a back-to-back stem-and-leaf diagram to represent this information, with Dolphins on the left-hand side of the diagram and Sharks on the right-hand side. [4]

- (ii) Find the median and interquartile range for the Dolphins. [3]

27. 9709_s19_qp_61 Q: 1

The times, t seconds, taken to swim 100 m were recorded for a group of 9 swimmers and were found to be as follows.

95 126 117 135 120 125 114 119 136

- (i) Find the values of $\Sigma(t - 120)$ and $\Sigma(t - 120)^2$. [2]

- (ii) Using your values found in part (i), calculate the variance of t . [2]

28. 9709_s19_qp_61 Q: 4

The Mathematics and English A-level marks of 1400 pupils all taking the same examinations are shown in the cumulative frequency graphs below. Both examinations are marked out of 100.

Use suitable data from these graphs to compare the central tendency and spread of the marks in Mathematics and English. [6]

29. 9709 - s19 - qp - 62 Q: 6

- (i) Give one advantage and one disadvantage of using a box-and-whisker plot to represent a set of data. [2]

- (ii) The times in minutes taken to run a marathon were recorded for a group of 13 marathon runners and were found to be as follows.

180 275 235 242 311 194 246 229 238 768 332 227 228

State which of the mean, mode or median is most suitable as a measure of central tendency for these times. Explain why the other measures are less suitable. [3]

- (iii) Another group of 33 people ran the same marathon and their times in minutes were as follows.

190	203	215	246	249	253	255	254	258	260	261
263	267	269	274	276	280	288	283	287	294	300
307	318	327	331	336	345	351	353	360	368	375

- (a) On the grid below, draw a box-and-whisker plot to illustrate the times for these 33 people. [4]

.....
.....
.....
.....
.....
.....
.....

- (b) Find the interquartile range of these times.

[1]

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

30. 9709_s19_qp_63 Q: 7

The times in minutes taken by 13 pupils at each of two schools in a cross-country race are recorded in the table below.

Thaters School	38	43	48	52	54	56	57	58	58	61	62	66	75
Whitefay Park School	45	47	53	56	56	61	64	66	69	73	75	78	83

- (i) Draw a back-to-back stem-and-leaf diagram to illustrate these times with Thaters School on the left. [4]

- (ii) Find the interquartile range of the times for pupils at Thaters School. [2]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

The times taken by pupils at Whitefay Park School are denoted by x minutes.

- (iii) Find the value of $\Sigma(x - 60)^2$. [2]

- (iv) It is given that $\Sigma(x - 60) = 46$. Use this result, together with your answer to part (iii), to find the variance of x . [2]

A large, semi-transparent watermark is positioned diagonally across the page. The word "Papa" is written in a bold, sans-serif font. The letters are partially cut off at the top right. The "P" is blue, the "a" is red, and the "p" is grey. Below the letters, there is a graphic element consisting of a blue shape resembling a speech bubble or a megaphone, with a red triangle pointing upwards from its top left corner. To the left of this shape, there is a cluster of small, colorful diamond-like dots in shades of red, green, and blue.

If you use the following lined page to complete the answer(s) to any question(s), the question number(s) must be clearly shown.

31. 9709_w19_qp_61 Q: 3

The mean and standard deviation of 20 values of x are 60 and 4 respectively.

- (i) Find the values of Σx and Σx^2 . [3]

Another 10 values of x are such that their sum is 550 and the sum of their squares is 40 500.

- (ii) Find the mean and standard deviation of all these 30 values of x . [4]

32. 9709_w19_qp_61 Q: 5

Ransha measured the lengths, in centimetres, of 160 palm leaves. His results are illustrated in the cumulative frequency graph below.

- (i) Estimate how many leaves have a length between 14 and 24 centimetres. [1]

Partners

- (ii) 10% of the leaves have a length of L centimetres or more. Estimate the value of L . [2]

.....
.....
.....
.....

- (iii) Estimate the median and the interquartile range of the lengths. [3]

.....
.....
.....
.....
.....
.....
.....

Sharim measured the lengths, in centimetres, of 160 palm leaves of a different type. He drew a box-and-whisker plot for the data, as shown on the grid below.

- (iv) Compare the central tendency and the spread of the two sets of data. [2]

34. 9709_w19_qp_62 Q: 3

The speeds, in km h^{-1} , of 90 cars as they passed a certain marker on a road were recorded, correct to the nearest km h^{-1} . The results are summarised in the following table.

Speed (km h^{-1})	10 – 29	30 – 39	40 – 49	50 – 59	60 – 89
Frequency	10	24	30	14	12

- (i) On the grid, draw a histogram to illustrate the data in the table.

[4]

- (ii) Calculate an estimate for the mean speed of these 90 cars as they pass the marker. [2]

A large, semi-transparent watermark is positioned diagonally across the page. The watermark features the text "PapaCambridge" in a bold, sans-serif font, with "Papa" in blue and "Cambridge" in red. A stylized graphic of a pen tip is integrated into the letter "P", with the barrel of the pen extending downwards and to the left. The pen is primarily blue with a red cap and a small green and red geometric pattern at the base.

35. 9709_w19_qp_63 Q: 5

Last Saturday, 200 drivers entering a car park were asked the time, in minutes, that it had taken them to travel from home to the car park. The results are summarised in the following cumulative frequency table.

Time (t minutes)	$t \leq 10$	$t \leq 20$	$t \leq 30$	$t \leq 50$	$t \leq 70$	$t \leq 90$
Cumulative frequency	16	50	106	146	176	200

- (i) On the grid, draw a cumulative frequency graph to illustrate the data.

[2]

- (ii) Use your graph to estimate the median of the data.

[1]

.....

.....

.....

.....

.....

.....

.....

.....

- (iii) For 80 of the drivers, the time taken was at least T minutes. Use your graph to estimate the value of T . [2]

.....
.....
.....
.....

- (iv) Calculate an estimate of the mean time taken by all 200 drivers to travel to the car park. [4]

A large, semi-transparent watermark reading "PapaCambridge" diagonally across the page. The text is in a red-to-blue gradient. Below the text is a stylized logo consisting of a blue and red shape with small green and red dots.

36. 9709_m18_qp_62 Q: 1

There are 900 students in a certain year-group. An identical puzzle is given to each student and the time taken, t minutes, to complete the puzzle is recorded. These times are summarised in the following frequency table.

Time taken, t minutes	$t \leq 3$	$3 < t \leq 4$	$4 < t \leq 5$	$5 < t \leq 6$	$6 < t \leq 8$	$8 < t \leq 10$	$10 < t \leq 14$
Frequency	120	180	200	160	110	80	50

On the grid, draw a cumulative frequency graph to represent the data. Use your graph to estimate the median time taken by these students to complete the puzzle. [4]

37. 9709 - m18 - qp - 62 Q: 5

A summary of n values of x gave the following information:

$$\Sigma(x - 20) = 136, \quad \Sigma(x - 20)^2 = 2888.$$

The mean of the n values of x is 24.25.

- (i) Find the value of n . [2]

edge

- (ii) Find Σx^2 . [4]

38. 9709_s18_qp_61 Q: 1

In a statistics lesson 12 people were asked to think of a number, x , between 1 and 20 inclusive. From the results Tom found that $\Sigma x = 186$ and that the standard deviation of x is 4.5. Assuming that Tom's calculations are correct, find the values of $\Sigma(x - 10)$ and $\Sigma(x - 10)^2$. [3]

A large, semi-transparent watermark is positioned diagonally across the page. The watermark features the text "PapaCambridge" in a stylized, rounded font. The letters are primarily red, with "Papa" in a lighter shade. Below the text is a graphic of a pencil. The pencil has a red eraser at the top and a blue body. Near the eraser, there is a small cluster of colorful dots in green, blue, and red.

39. 9709_s18_qp_61 Q: 2

In a survey 55 students were asked to record, to the nearest kilometre, the total number of kilometres they travelled to school in a particular week. The results are shown below.

5	5	9	10	13	13	13	15	15	15	15
16	18	18	18	19	19	20	20	20	20	21
21	21	21	23	25	25	27	27	29	30	33
35	38	39	40	42	45	48	50	50	51	51
52	55	57	57	60	61	64	65	66	69	70

- (i) On the grid, draw a box-and-whisker plot to illustrate the data.

[5]

An ‘outlier’ is defined as any data value which is more than 1.5 times the interquartile range above the upper quartile, or more than 1.5 times the interquartile range below the lower quartile.

- (ii) Show that there are no outliers.

[2]

40. 9709 - s18 - qp - 62 Q: 1

Each of a group of 10 boys estimates the length of a piece of string. The estimates, in centimetres, are as follows.

37 40 45 38 36 38 42 38 40 39

- (i) Find the mode. [1]

bridge

- (ii) Find the median and the interquartile range. [3]

A red and blue rocket ship is shown launching upwards from a white surface. The rocket has a red cylindrical body with a blue base and fins. It leaves a diagonal trail of dotted lines across the frame, suggesting motion. The background is white.

41. 9709_s18_qp_62 Q: 5

The lengths, t minutes, of 242 phone calls made by a family over a period of 1 week are summarised in the frequency table below.

Length of phone call (t minutes)	$0 < t \leq 1$	$1 < t \leq 2$	$2 < t \leq 5$	$5 < t \leq 10$	$10 < t \leq 30$
Frequency	14	46	102	a	40

- (i) Find the value of a . [1]

 **edge**

- (ii) Calculate an estimate of the mean length of these phone calls. [2]

A large, semi-transparent red watermark with the text "PapaCam" in a bold, sans-serif font, oriented diagonally from the bottom-left towards the top-right. The background of the slide features a stylized graphic of a camera lens, colored blue and red, positioned in the lower-left quadrant. At the base of the lens is a white flower icon with green leaves and small red and green dots.

(iii) On the grid, draw a histogram to illustrate the data in the table.

[4]

42. 9709_s18_qp_63 Q: 1

The masses in kilograms of 50 children having a medical check-up were recorded correct to the nearest kilogram. The results are shown in the table.

Mass (kg)	10 – 14	15 – 19	20 – 24	25 – 34	35 – 59
Frequency	6	12	14	10	8

- (i) Find which class interval contains the lower quartile. [1]

.....
.....
.....

- (ii) On the grid, draw a histogram to illustrate the data in the table. [4]

43. 9709_s18_qp_63 Q: 4

Farfield Travel and Lacket Travel are two travel companies which arrange tours abroad. The numbers of holidays arranged in a certain week are recorded in the table below, together with the means and standard deviations of the prices.

	Number of holidays	Mean price (\$)	Standard deviation (\$)
Farfield Travel	30	1500	230
Lacket Travel	21	2400	160

- (i) Calculate the mean price of all 51 holidays. [2]

.....

- (ii) The prices of individual holidays with Farfield Travel are denoted by $\$x_F$ and the prices of individual holidays with Lacket Travel are denoted by $\$x_L$. By first finding $\sum x_F^2$ and $\sum x_L^2$, find the standard deviation of the prices of all 51 holidays. [5]

.....

.....

.....

.....

44. 9709_w18_qp_61 Q: 6

The daily rainfall, x mm, in a certain village is recorded on 250 consecutive days. The results are summarised in the following cumulative frequency table.

Rainfall, x mm	$x \leq 20$	$x \leq 30$	$x \leq 40$	$x \leq 50$	$x \leq 70$	$x \leq 100$
Cumulative frequency	52	94	142	172	222	250

- (i) On the grid, draw a cumulative frequency graph to illustrate the data. [2]

- (ii) On 100 of the days, the rainfall was k mm or more. Use your graph to estimate the value of k .

[2]

.....

.....

.....

(iii) Calculate estimates of the mean and standard deviation of the daily rainfall in this village. [6]

A large, semi-transparent watermark is positioned diagonally across the page. The watermark features the text "PapaCambridge" in a bold, sans-serif font. The letters are colored in a gradient from red at the top to blue at the bottom. Below the text is a graphic element consisting of two overlapping diamonds: one red and one blue. At the base of this graphic is a small circular emblem containing a green and red pattern of dots and lines.

45. 9709_w18_qp_62 Q: 2

The following back-to-back stem-and-leaf diagram shows the reaction times in seconds in an experiment involving two groups of people, A and B.

	A		B	
(4)	4 2 0 0	20	5 6 7	(3)
(5)	9 8 5 0 0	21	1 2 2 3 7 7	(6)
(8)	9 8 7 5 3 2 2 2	22	1 3 5 6 6 8 9	(7)
(6)	8 7 6 5 2 1	23	4 5 7 8 8 9 9 9	(8)
(3)	8 6 3	24	2 4 5 6 7 8 8	(7)
(1)	0	25	0 2 7 8	(4)

Key: 5 | 22 | 6 means a reaction time of 0.225 seconds for A and 0.226 seconds for B

- (i) Find the median and the interquartile range for group A. [3]

.....

The median value for group B is 0.235 seconds, the lower quartile is 0.217 seconds and the upper quartile is 0.245 seconds.

- (ii) Draw box-and-whisker plots for groups A and B on the grid. [3]

46. 9709_w18_qp_62 Q: 5

The Quivers Archery club has 12 Junior members and 20 Senior members. For the Junior members, the mean age is 15.5 years and the standard deviation of the ages is 1.2 years. The ages of the Senior members are summarised by $\Sigma y = 910$ and $\Sigma y^2 = 42850$, where y is the age of a Senior member in years.

- (i) Find the mean age of all 32 members of the club. [2]

- (ii) Find the standard deviation of the ages of all 32 members of the club. [4]

A large, semi-transparent watermark is positioned diagonally across the page. The watermark features the text "PapaCambridge" in a bold, sans-serif font, with "Papa" in blue and "Cambridge" in red. A stylized graphic of a rocket ship is integrated into the letter "P". The rocket has a blue base, a red middle section with a white window, and a grey top section. Small, colorful geometric shapes (pink, green, blue) are scattered near the base of the rocket.

47. 9709_w18_qp_63 Q: 7

The heights, in cm, of the 11 members of the Anvils athletics team and the 11 members of the Brecons swimming team are shown below.

Anvils	173	158	180	196	175	165	170	169	181	184	172
Brecons	166	170	171	172	172	178	181	182	183	183	192

- (i) Draw a back-to-back stem-and-leaf diagram to represent this information, with Anvils on the left-hand side of the diagram and Brecons on the right-hand side. [4]

- (ii) Find the median and the interquartile range for the heights of the Anvils. [3]

.....

.....

.....

.....

The heights of the 11 members of the Anvils are denoted by x cm. It is given that $\Sigma x = 1923$ and $\Sigma x^2 = 337\,221$. The Anvils are joined by 3 new members whose heights are 166 cm, 172 cm and 182 cm.

- (iii) Find the standard deviation of the heights of all 14 members of the Anvils. [4]

If you use the following lined page to complete the answer(s) to any question(s), the question number(s) must be clearly shown.

48. 9709 - m17 - qp - 62 Q: 1

Twelve values of x are shown below.

1761.6	1758.5	1762.3	1761.4	1759.4	1759.1
1762.5	1761.9	1762.4	1761.9	1762.8	1761.0

Find the mean and standard deviation of $(x - 1760)$. Hence find the mean and standard deviation of x .

[4]

49. 9709_s17_qp_61 Q: 1

Kadijat noted the weights, x grams, of 30 chocolate buns. Her results are summarised by

$$\Sigma(x - k) = 315, \quad \Sigma(x - k)^2 = 4022,$$

where k is a constant. The mean weight of the buns is 50.5 grams.

- (i) Find the value of k . [2]

- (ii) Find the standard deviation of x . [2]

50. 9709_s17_qp_61 Q: 4

The times taken, t seconds, by 1140 people to solve a puzzle are summarised in the table.

Time (t seconds)	$0 \leq t < 20$	$20 \leq t < 40$	$40 \leq t < 60$	$60 \leq t < 100$	$100 \leq t < 140$
Number of people	320	280	220	220	100

- (i) On the grid, draw a histogram to illustrate this information. [4]

- (ii) Calculate an estimate of the mean of t . [2]

51. 9709_s17_qp_62 Q: 1

Rani and Diksha go shopping for clothes.

- (i) Rani buys 4 identical vests, 3 identical sweaters and 1 coat. Each vest costs \$5.50 and the coat costs \$90. The mean cost of Rani's 8 items is \$29. Find the cost of a sweater. [3]

- (ii) Diksha buys 1 hat and 4 identical shirts. The mean cost of Diksha's 5 items is \$26 and the standard deviation is \$0. Explain how you can tell that Diksha spends \$104 on shirts. [2]

52. 9709_s17_qp_62 Q: 2

Anabel measured the lengths, in centimetres, of 200 caterpillars. Her results are illustrated in the cumulative frequency graph below.

- (i) Estimate the median and the interquartile range of the lengths. [3]

.....

- (ii) Estimate how many caterpillars had a length of between 2 and 3.5 cm. [1]

.....

- (iii) 6% of caterpillars were of length l centimetres or more. Estimate l . [2]

.....

53. 9709_s17_qp_63 Q: 7

The following histogram represents the lengths of worms in a garden.

- (i) Calculate the frequencies represented by each of the four histogram columns. [2]

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

- (ii) On the grid on the next page, draw a cumulative frequency graph to represent the lengths of worms in the garden. [4]

- (iii) Use your graph to estimate the median and interquartile range of the lengths of worms in the garden. [3]

- (iv) Calculate an estimate of the mean length of worms in the garden. [2]

54. 9709_w17_qp_61 Q: 2

The time taken by a car to accelerate from 0 to 30 metres per second was measured correct to the nearest second. The results from 48 cars are summarised in the following table.

Time (seconds)	3 – 5	6 – 8	9 – 11	12 – 16	17 – 25
Frequency	10	15	17	4	2

- (i) On the grid, draw a cumulative frequency graph to represent this information. [3]

- (ii) 35 of these cars accelerated from 0 to 30 metres per second in a time more than t seconds.
 Estimate the value of t . [2]

.....

.....

.....

.....

55. 9709_w17_qp_61 Q: 4

The ages of a group of 12 people at an Art class have mean 48.7 years and standard deviation 7.65 years. The ages of a group of 7 people at another Art class have mean 38.1 years and standard deviation 4.2 years.

- (i) Find the mean age of all 19 people. [2]

A red decorative graphic element consisting of three overlapping semi-circles at the bottom right corner of the page.

- (ii) The individual ages in years of people in the first Art class are denoted by x and those in the second Art class by y . By first finding $\sum x^2$ and $\sum y^2$, find the standard deviation of the ages of all 19 people. [4]

The logo for PapaCar features a stylized car with a red roof and blue body, angled towards the left. The word "PapaCar" is written diagonally across the car in a large, bold, red font. Below the car, there is a small cluster of colorful geometric shapes, including green diamonds and red squares.

56. 9709_w17_qp_62 Q: 1

Andy counts the number of emails, x , he receives each day and notes that, over a period of n days, $\Sigma(x - 10) = 27$ and the mean number of emails is 11.5. Find the value of n . [3]

57. 9709_w17_qp_62 Q: 2

The circumferences, c cm, of some trees in a wood were measured. The results are summarised in the table.

Circumference (c cm)	$40 < c \leq 50$	$50 < c \leq 80$	$80 < c \leq 100$	$100 < c \leq 120$
Frequency	14	48	70	8

- (i) On the grid, draw a cumulative frequency graph to represent the information.

[3]

- (ii) Estimate the percentage of trees which have a circumference larger than 75 cm.

[2]

.....

.....

.....

58. 9709_w17_qp_63 Q: 2

Tien measured the arm lengths, x cm, of 20 people in his class. He found that $\Sigma x = 1218$ and the standard deviation of x was 4.2. Calculate $\Sigma(x - 45)$ and $\Sigma(x - 45)^2$. [3]

59. 9709_w17_qp_63 Q: 5

The number of Olympic medals won in the 2012 Olympic Games by the top 27 countries is shown below.

104	88	82	65	44	38	35	34	28
28	18	18	17	17	14	13	13	12
12	10	10	10	9	6	5	2	2

- (i) Draw a stem-and-leaf diagram to illustrate the data. [4]
(ii) Find the median and quartiles and draw a box-and-whisker plot on the grid. [5]

60. 9709_m16_qp_62 Q: 1

For 10 values of x the mean is 86.2 and $\Sigma(x - a) = 362$. Find the value of

(i) Σx , [1]

(ii) the constant a . [2]

61. 9709_m16_qp_62 Q: 4

A survey was made of the journey times of 63 people who cycle to work in a certain town. The results are summarised in the following cumulative frequency table.

Journey time (minutes)	≤ 10	≤ 25	≤ 45	≤ 60	≤ 80
Cumulative frequency	0	18	50	59	63

(i) State how many journey times were between 25 and 45 minutes. [1]

(ii) Draw a histogram on graph paper to represent the data. [4]

(iii) Calculate an estimate of the mean journey time. [2]

62. 9709_s16_qp_61 Q: 7

The amounts spent by 160 shoppers at a supermarket are summarised in the following table.

Amount spent (\$x)	$0 < x \leq 30$	$30 < x \leq 50$	$50 < x \leq 70$	$70 < x \leq 90$	$90 < x \leq 140$
Number of shoppers	16	40	48	26	30

(i) Draw a cumulative frequency graph of this distribution. [4]

(ii) Estimate the median and the interquartile range of the amount spent. [3]

(iii) Estimate the number of shoppers who spent more than \$115. [2]

(iv) Calculate an estimate of the mean amount spent. [2]

63. 9709_s16_qp_62 Q: 5

The following are the maximum daily wind speeds in kilometres per hour for the first two weeks in April for two towns, Bronlea and Rogate.

Bronlea	21	45	6	33	27	3	32	14	28	24	13	17	25	22
Rogate	7	5	4	15	23	7	11	13	26	18	23	16	10	34

(i) Draw a back-to-back stem-and-leaf diagram to represent this information. [5]

(ii) Write down the median of the maximum wind speeds for Bronlea and find the interquartile range for Rogate. [3]

(iii) Use your diagram to make one comparison between the maximum wind speeds in the two towns. [1]

64. 9709_s16_qp_63 Q: 2

A group of children played a computer game which measured their time in seconds to perform a certain task. A summary of the times taken by girls and boys in the group is shown below.

	Minimum	Lower quartile	Median	Upper quartile	Maximum
Girls	5	5.5	7	9	13
Boys	4	6	8.5	11	16

- (i) On graph paper, draw two box-and-whisker plots in a single diagram to illustrate the times taken by girls and boys to perform this task. [3]

- (ii) State two comparisons of the times taken by girls and boys. [2]
-

65. 9709_s16_qp_63 Q: 4

The monthly rental prices, $\$x$, for 9 apartments in a certain city are listed and are summarised as follows.

$$\Sigma(x - c) = 1845 \quad \Sigma(x - c)^2 = 477\,450$$

The mean monthly rental price is $\$2205$.

- (i) Find the value of the constant c . [2]
- (ii) Find the variance of these values of x . [2]
- (iii) Another apartment is added to the list. The mean monthly rental price is now $\$2120.50$. Find the rental price of this additional apartment. [2]
-

66. 9709_w16_qp_61 Q: 7

The masses, in grams, of components made in factory A and components made in factory B are shown below.

Factory A	0.049	0.050	0.053	0.054	0.057	0.058	0.058
	0.059	0.061	0.061	0.061	0.063	0.065	
Factory B	0.031	0.056	0.049	0.044	0.038	0.048	0.051
	0.064	0.035	0.042	0.047	0.054	0.058	

- (i) Draw a back-to-back stem-and-leaf diagram to represent the masses of components made in the two factories. [5]
- (ii) Find the median and the interquartile range for the masses of components made in factory B . [3]
- (iii) Make two comparisons between the masses of components made in factory A and the masses of those made in factory B . [2]
-

67. 9709_w16_qp_62 Q: 5

The number of people a football stadium can hold is called the ‘capacity’. The capacities of 130 football stadiums in the UK, to the nearest thousand, are summarised in the table.

Capacity	3000–7000	8000–12 000	13 000–22 000	23 000–42 000	43 000–82 000
Number of stadiums	40	30	18	34	8

- (i) On graph paper, draw a histogram to represent this information. Use a scale of 2 cm for a capacity of 10 000 on the horizontal axis. [5]

- (ii) Calculate an estimate of the mean capacity of these 130 stadiums. [2]

- (iii) Find which class in the table contains the median and which contains the lower quartile. [2]

68. 9709_w16_qp_63 Q: 5

The tables summarise the heights, h cm, of 60 girls and 60 boys.

Height of girls (cm)	140 < $h \leq 150$	150 < $h \leq 160$	160 < $h \leq 170$	170 < $h \leq 180$	180 < $h \leq 190$
Frequency	12	21	17	10	0

Height of boys (cm)	140 < $h \leq 150$	150 < $h \leq 160$	160 < $h \leq 170$	170 < $h \leq 180$	180 < $h \leq 190$
Frequency	0	20	23	12	5

- (i) On graph paper, using the same set of axes, draw two cumulative frequency graphs to illustrate the data. [4]

- (ii) On a school trip the students have to enter a cave which is 165 cm high. Use your graph to estimate the percentage of the girls who will be unable to stand upright. [3]

- (iii) The students are asked to compare the heights of the girls and the boys. State one advantage of using a pair of box-and-whisker plots instead of the cumulative frequency graphs to do this. [1]

69. 9709_s15_qp_61 Q: 2

The table summarises the lengths in centimetres of 104 dragonflies.

Length (cm)	2.0 – 3.5	3.5 – 4.5	4.5 – 5.5	5.5 – 7.0	7.0 – 9.0
Frequency	8	25	28	31	12

- (i) State which class contains the upper quartile. [1]

- (ii) Draw a histogram, on graph paper, to represent the data. [4]

70. 9709_s15_qp_61 Q: 5

The table shows the mean and standard deviation of the weights of some turkeys and geese.

	Number of birds	Mean (kg)	Standard deviation (kg)
Turkeys	9	7.1	1.45
Geese	18	5.2	0.96

(i) Find the mean weight of the 27 birds. [2]

(ii) The weights of individual turkeys are denoted by x_t kg and the weights of individual geese by x_g kg. By first finding $\sum x_t^2$ and $\sum x_g^2$, find the standard deviation of the weights of all 27 birds.

[5]

71. 9709_s15_qp_62 Q: 2

120 people were asked to read an article in a newspaper. The times taken, to the nearest second, by the people to read the article are summarised in the following table.

Time (seconds)	1 – 25	26 – 35	36 – 45	46 – 55	56 – 90
Number of people	4	24	38	34	20

Calculate estimates of the mean and standard deviation of the reading times. [5]

72. 9709_s15_qp_62 Q: 3

In an open-plan office there are 88 computers. The times taken by these 88 computers to access a particular web page are represented in the cumulative frequency diagram.

- (i) On graph paper draw a box-and-whisker plot to summarise this information. [4]

An ‘outlier’ is defined as any data value which is more than 1.5 times the interquartile range above the upper quartile, or more than 1.5 times the interquartile range below the lower quartile.

- (ii) Show that there are no outliers. [2]

73. 9709_s15_qp_63 Q: 6

3

Seventy samples of fertiliser were collected and the nitrogen content was measured for each sample. The cumulative frequency distribution is shown in the table below.

Nitrogen content	≤ 3.5	≤ 3.8	≤ 4.0	≤ 4.2	≤ 4.5	≤ 4.8
Cumulative frequency	0	6	18	41	62	70

- (i) On graph paper draw a cumulative frequency graph to represent the data. [3]
- (ii) Estimate the percentage of samples with a nitrogen content greater than 4.4. [2]
- (iii) Estimate the median. [1]
- (iv) Construct the frequency table for these results and draw a histogram on graph paper. [5]

74. 9709_w15_qp_61 Q: 3

Robert has a part-time job delivering newspapers. On a number of days he noted the time, correct to the nearest minute, that it took him to do his job. Robert used his results to draw up the following table; two of the values in the table are denoted by a and b .

Time (t minutes)	60 – 62	63 – 64	65 – 67	68 – 71
Frequency (number of days)	3	9	6	b
Frequency density	1	a	2	1.5

- (i) Find the values of a and b . [3]
- (ii) On graph paper, draw a histogram to represent Robert's times. [3]

75. 9709_w15_qp_62 Q: 1

For n values of the variable x , it is given that $\Sigma(x - 100) = 216$ and $\Sigma x = 2416$. Find the value of n . [3]

76. 9709_w15_qp_62 Q: 5

The weights, in kilograms, of the 15 rugby players in each of two teams, A and B , are shown below.

Team A	97	98	104	84	100	109	115	99	122	82	116	96	84	107	91
Team B	75	79	94	101	96	77	111	108	83	84	86	115	82	113	95

- (i) Represent the data by drawing a back-to-back stem-and-leaf diagram with team A on the left-hand side of the diagram and team B on the right-hand side. [4]
- (ii) Find the interquartile range of the weights of the players in team A . [2]
- (iii) A new player joins team B as a substitute. The mean weight of the 16 players in team B is now 93.9 kg. Find the weight of the new player. [3]

77. 9709_w15_qp_63 Q: 1

The time taken, t hours, to deliver letters on a particular route each day is measured on 250 working days. The mean time taken is 2.8 hours. Given that $\Sigma(t - 2.5)^2 = 96.1$, find the standard deviation of the times taken. [3]

78. 9709_w15_qp_63 Q: 6

The heights to the nearest metre of 134 office buildings in a certain city are summarised in the table below.

Height (m)	21 – 40	41 – 45	46 – 50	51 – 60	61 – 80
Frequency	18	15	21	52	28

- (i) Draw a histogram on graph paper to illustrate the data. [4]
- (ii) Calculate estimates of the mean and standard deviation of these heights. [5]
